

# Tomato Cage Ghost

## Supplies:

- Tomato cage \*\*
- White mini string lights \*\*
- Black acrylic paint \*\*
- Small paint brush \*\*
- Zip ties \*\*
- White plastic tablecloth \*\*
- Styrofoam ball (8" half or whole)

\*\* = available at Evey True Value Hardware while supplies last

## Instructions:

1. Turn the tomato cage upside down so it stands freely on the ground. This will create the body shape.
2. Push the Styrofoam onto the top three wire prongs until secure. This will create the head shape.
3. Wrap the lights around the tomato cage starting at the top by the head. Secure lights with zip ties as needed. Remember to keep the plug end of the lights towards the bottom of the tomato cage and long enough to reach an outlet.
4. Drape the tablecloth over the Styrofoam and tomato cage structure. This will create the ghost-like appearance.
5. Paint the eyes onto the ghost shaped tablecloth to finish the look! Let dry.
6. Plug the ghost into an outlet and enjoy the spooky sight!
